Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 7 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, line 3, the language, "the formlocking ring" lacks a proper antecedent basis.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6, 8-10, 13-14, 16-17 and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Westphal (4,899,167) [submitted by applicant].

Westphal in figures 1-4 discloses a central dish 1 fixedly mounted on a central supporting body 2; a plurality of deployable sheet-like panels 7 hinged to the central supporting body and arranged around the central dish (see abstract, figure 3a); wherein the rotation axes of each of individual ones of the deployable sheet-like panels are tilted with respect to a center point of the central dish (figures 1a,2a-2d), and wherein, in a stowed configuration (figure 1a) of the reflector, the deployable sheet-like panels are at least partially deflected in order to minimize an envelope of the reflector and the panels relax upon entering a deployment configuration (figure 1); wherein a damping device 10

is mounted on one of the sheet-like panels 7 in order to simultaneously damp the motion of the sheet-like panels during deployment, wherein the central supporting body is a hollow ring 9a and the panels are made of carbon fiber reinforced plastic (Back Ground of Invention).

Allowable Subject Matter

3. Claims 4-5, 7, 11-12, 15 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Palmer, Hoyer, Berks et al, Higgins et al and Wade et al are cited as of interested and illustrated a similar structure to foldable reflector assembly.
